PROFESSIONAL SUMMARY

Final-year Computer Science student skilled in full-stack MERN development, with a track record of building and shipping real-world applications, including real-time platforms, role-based systems, and data-driven dashboards. Experienced working in fast-paced environments through internships and IEEE leadership.

EDUCATION

B.Tech – Computer Science and Design | *G H Patel College of Engineering & Technology, Anand, Gujarat*
2023 – 2027

CGPA: 9.36 /10 (up to 6th semester) | 10/10 SGPA in 1st semester

INTERNSHIP EXPERIENCE

Product Engineer & Design Intern | *Aurxon (Early-Stage Startup)* May 2026

- Optimized the Next.js company website: improved Lighthouse performance score and reduced load time through targeted frontend optimizations.
- Built RAAP (Resume Analyzer & Alignment Platform): an AI recruitment tool using GLiNER for skill entity extraction and all-MiniLM-L6-v2 embeddings for semantic JD-resume matching, with a FastAPI backend and Next.js frontend.

Web Development Intern | *Zidio Development (Remote)* May 2025 – June 2025

- Built Datalytics: a full-stack MERN analytics platform with interactive 2D/3D visualizations, with significantly improved dataset handling capacity.
- Implemented JWT-based authentication, admin dashboard, dataset history management, and AI-based data summarization via REST APIs.

PROJECTS

WorkspaceOne | *Next.js, Node.js, Socket.IO, MongoDB, Supabase* [Live GitHub](#)

- Built a unified real-time collaboration platform combining Slack-style messaging and Trello-style task management in a single app, with Socket.IO, voice messages, and Google OAuth.
- Architected MongoDB schema and backend APIs for workspace, channel, and task management.

UrbanResolve | *MERN Stack, FastAPI, Python, OpenCV* [GitHub](#)

- Developed a civic issue management system with role-based access (users/admins/workers), location-tagged image upload, and an AI confidence scoring engine using OpenCV — analyzing image quality, category weights, criticality, and report frequency.
- Designed task assignment workflow and admin dashboard with report generation.

Stock Search & Analysis Platform | *Flask, Python, React.js* [Live GitHub](#)

- Built an intent-based stock search system using BM25 ranking for improved relevance; designed Flask APIs integrated with a React frontend for search and filtering.

TECHNICAL SKILLS

Languages: JavaScript, Python, C++

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, Flask, Django

Databases: MongoDB, MySQL, SQLite

AI / NLP: GLiNER, Sentence Transformers (all-MiniLM-L6-v2), NLP Pipelines

Tools & Others: Git, GitHub, Postman, Socket.IO, NextAuth, JWT, REST APIs, Figma, VS Code

LEADERSHIP & ACHIEVEMENTS

- Secretary, IEEE GCET Student Branch '26 | Chair, IEEE Computer Society '26 | Vice Chair, IEEE CS '25
- Participated in Adobe Hackathon 2025, Odoo Hackathon 2025, SIH 2025, Odoo × GCET Hackathon, and UIDAI Data Hackathon.
- Received Best Award distinction at Aurxon internship completion (May 2026).
